

Do you have a professional interest in radiotherapy research?

JOIN THE TRANS TASMAN RADIATION ONCOLOGY GROUP (TROG)

Half of all people diagnosed with cancer would benefit from radiotherapy. The Trans Tasman Radiation Oncology Group (TROG Cancer Research) is the peak Australasian body for research into this safe and effective treatment. TROG is currently the highest recruiting collaborative trials group in Australia.

BECOME A MEMBER - IT'S FREE!

Become part of our network of 1,000 professionals in this exciting field.

Affiliate membership is FREE and open to anyone qualified or training in a radiotherapy-related discipline.

By joining, you'll help advance clinical research into a treatment that benefits many cancers including breast, skin, lung, prostate and bladder, gynaecological and head & neck.

- Network with like-minded professionals
- Stay up-to-date with industry news and opportunities in our fortnightly eNews
- Access trial resources and Quality Assurance resources
- Utilise the knowledge of TROG's specialised committees

OR BECOME A FULL MEMBER NOW OPEN TO ANYONE QUALIFIED IN THEIR DISCIPLINE

As of 2014, anyone fully qualified in their discipline, including radiation oncologists, medical oncologists, radiation therapists, medical physicists, statisticians, data managers, nurses and surgeons, can become a full TROG member.

For just \$180+gst per year, full members hold voting rights at TROG meetings; can submit proposals for new trials; or become a Board member or Trial Chair.

- Receive support at all stages of your trial's development
- Strengthen your grant application by aligning with TROG
- Hold voting rights on trial protocols and other policies
- Ensure treatment is safely administered via our QA program

WINNER
'Innovation in Cancer Clinical Trials' award
2013 NSW Premiers Awards for Outstanding Cancer Research
